

FIG. 1 is a perspective view of a device 100 in accordance with the present invention. The device 100 includes a base 102, a top surface 104, and a bottom surface 106. The base 102 is formed by a pair of opposed side walls 108 and 110, and a front wall 112. The top surface 104 is formed by a pair of opposed side walls 114 and 116, and a front wall 118. The bottom surface 106 is formed by a pair of opposed side walls 120 and 122, and a front wall 124. The device 100 is configured to receive a component 126, which is shown in FIG. 2. The component 126 is a rectangular block with a top surface 128, a bottom surface 130, and side walls 132 and 134. The component 126 is shown in FIG. 2 in a position where it is being inserted into the device 100. The component 126 is shown in FIG. 2 in a position where it is being inserted into the device 100. The component 126 is shown in FIG. 2 in a position where it is being inserted into the device 100.
